

LAMB STUDY

- Since lamb data is limited, a study is being proposed.
 - Dr. Gretchen Hilton, OSU
- Data exists for WBS and Trained Sensory & Consumers
- Little (No) data exists for the relationship of WBS and consumer acceptability
- Propose to determine as similar studies in beef and pork

PROPOSED QUESTIONS – LAMB STUDY

- 100 Consumers – Lamb & Non-Lamb Eaters?
- 30 Lamb loins considered “tough”, “intermediate,” “tender”
 - We will just have to use beef classification system or try to determine our own since we don’t know what it would be for lamb (this will be a challenge).
- Researchers will prepare and serve for consistency – this should decrease number of consumers needed.
